

# Easily integrate EARNIE with Isys Intelligent Time™

EARNIE integrates seamlessly with Intelligent Time™ to save a huge amount of time and cost on payroll processing. Time and Attendance data captured in Intelligent Time™ (paid hours, overtime, holiday, sickness, absence etc) is imported by Earnie at the end of the payroll period to prevent any manual input. The accuracy and integrity of the data exported from Intelligent Time takes away the burden of erroneous paper timesheet data, manual entry and operator mistakes.

Our customers who benefit from this integration can testify that they now have a huge amount of time available to carry out their regular duties, without spending hours a day sifting through manual timesheets and making many phone calls to query errors. From the employee's point of view, they can be reassured that they're being paid correctly and on time for the work they've carried out. No more paper trails and calls to line managers, the information is always accurate and correct.

## Intelligent Time™

	A	B	C	D	E	F	G
1	Surname	Payroll No	Hours	Overtime	Hols	Sick	Abs
2	Barnes	973	40	5.25	0	0	0
3	Smith	564	32	0	0	1	0
4	Briant	365	32	2.5	1	0	0
5	A'chert	911	40	0	0	0	0
6	Parker	343	32	0	0	0	1
7							

2-way data integration between Intelligent Time and EARNIE is also available, meaning information input in EARNIE is synchronized with Intelligent Time: and vice-versa. This again saves time through only having to input information once, and ensures the accuracy integrity of data between software applications.
